

Getting your samples ready for testing

Nadia Hetzel

Cypress Bend Vineyards

Example:
Carlos 12 Acre

Don't forget to label your Sample bag with your sample ID so you can identify which vineyard or plot each sample came from.

Squish the berries in the bag to yield juice.

Don't worry about hard green berries, they will likely drop out at the crusher destemmer and won't press anyway.

Cut bag at bottom edge to pour out juice

Enclose this form with each set of samples you mail. Keep a copy for your records.

Name _____

Vineyard name: _____

Mailing address: _____

Email: _____

Phone number: _____

Date sampled: _____

Grape variety: _____

If sending more than one sample of a variety, give an ID number for this sample: _____

(For example, Carlos-12 Acre, Carlos-4Acre, MagOldVine)

This is an M-QEP sample (cost covered by NCMGA)

I am paying for testing this sample.
